What I Use

Git, Perforce, SVN
PhotoShop, Illustrator
Chrome DevTools

Where I Studied

Simon Fraser University (2012)
B.Sc in Interactive Arts and Technology
Certificate in Computer Studies

Yardi - Energy

www.EngagementDashboard.com/directory

2017 - Current
Software Engineer

- Performed full stack development tasks on various web applications and services involving property energy consumption
- Implemented a highly configurable dashboard web app which includes administrative and public views displaying various energy usage and consumption across multiple properties
- Developed an email report service which generates a list of email template where each template is populated with the user's portfolio energy consumption data
- Built a landing page which summarizes energy usage specifics across a user's portfolio
- Technologies used: AngularJS, Java/Spark, SQL, LESS, HTML5, Git

Electronic Arts - Origin

www.Origin.com

2012 - 2017
Software Engineer

- Performed front end development, telemetry, and AB testing tasks on an e-commerce video game distribution platform which has over 5 million daily users
- Collaborated with designers and translate mocks into web modules and landing pages
- Served as development owner of AB Testing & Telemetry and was point of contact to various marketing teams for Telemetry, Pixel Tracking, and AB Testing requests
- Applied Google Analytics tracking events and Optimizely AB Tests to help marketing and design teams understand user behaviour, which lead to the development of new features that increased conversation rates
- Technologies used: JavaScript/jQuery, HTML/Bootstrap, CSS, PHP/Symfony/TWIG, Tealium, Google Analytics, Optimizely AB Testing, Perforce/SVN, Photoshop

HSBC Bank - Net

www.HsbcNet.com

2010 - 2011
Web Developer

- Performed front end prototyping tasks on a commercial financial management platform
- Built web prototypes for future projects from sketches to aid business and development teams understand project scopes and identify potential problems
- Prototypes were utilized during team lead meetings to discuss updates to project requirements
- Performed regular code deployments to testing environments which were used to update existing client web products
- Technologies used: HTML, CSS, JavaScript/jQuery, MKS
